

# CAREER ROADMAP

Student → Software / Platform Engineering Role | 3-Month Sprint Plan

## ■ CURRENT POSITION

**Profile:** Final-year Engineering Student (GMRIT)  
**Core Strengths:** Java & DSA (arrays, DP, linked lists, tries, segment trees), SQL (joins, subqueries, SQLite), ServiceNow platform exposure (Business Rules, ACLs, CMDB, Flow Designer)  
**Differentiator:** Rare hybrid of coding fundamentals + enterprise platform (ServiceNow) knowledge

## ■ TARGET GOAL

**Primary Goal:** Get hired for an entry-level SDE / Support / Platform Engineer role  
**Timeline:** 3 months (fast-track, high-intensity)  
**Success Metric:** 5+ interview loops secured, 1 signed offer by Month 3

## ■ SKILL GAP ANALYSIS

| Skill Area                 | Current Level             | Required for Goal        | Status    |
|----------------------------|---------------------------|--------------------------|-----------|
| Java + DSA                 | Strong (regular practice) | Interview-ready fluency  | STRENGTH  |
| SQL                        | Good (joins, subqueries)  | Window fns, query tuning | MINOR GAP |
| ServiceNow                 | Certified basics          | Portfolio-level project  | STRENGTH  |
| System Design (basic)      | Not started               | LLD + basic HLD          | GAP       |
| Resume + GitHub Portfolio  | Not built                 | Recruiter-ready          | GAP       |
| Behavioral / HR Interviews | Untested                  | Confident STAR answers   | GAP       |

## ■ RECOMMENDED LEARNING PLAN

| Phase   | Focus                                                                | Key Deliverable                             |
|---------|----------------------------------------------------------------------|---------------------------------------------|
| Month 1 | DSA mastery (LC 150 pattern set), Advanced SQL, Resume v1            | Resume + GitHub live, 60 problems solved    |
| Month 2 | System design basics, 2 portfolio projects, mock interviews begin    | 2 projects deployed, 3 mock interviews done |
| Month 3 | Applications at scale, behavioral prep, referrals, offer negotiation | 15+ applications/week, 1 offer target       |

## ■ SUGGESTED PROJECTS

**1. ServiceNow + Java Ticketing Automation** — Custom app: Business Rules + Flow Designer + REST API integration  
**2. SQL-Powered Analytics Dashboard** — Complex joins/window functions on a real dataset, visualized  
**3. DSA Problem Tracker (Java)** — CLI/web tool logging patterns solved, showcases code quality

## ■ NETWORKING STRATEGY

- Optimize LinkedIn headline: "Java | DSA | ServiceNow | Aspiring SDE"
- Connect with 5 GMRIT alumni/week in target companies
- Join ServiceNow Community + Dev forums, post project updates
- Attend campus placement drives + 1 tech meetup/hackathon monthly
- Request referrals after 2 genuine conversations, not cold asks

## ■ MONTHLY MILESTONES

| Month 1: Foundation                                                                                                                                           | Month 2: Build & Prove                                                                                                                                      | Month 3: Apply & Convert                                                                                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>Resume + LinkedIn live</li><li>60 DSA problems</li><li>SQL advanced topics done</li><li>GitHub profile set up</li></ul> | <ul style="list-style-type: none"><li>2 projects deployed</li><li>System design basics</li><li>3+ mock interviews</li><li>10 alumni contacts made</li></ul> | <ul style="list-style-type: none"><li>15+ applications/week</li><li>Behavioral prep complete</li><li>Referrals activated</li><li>Offer negotiation ready</li></ul> |

## ■ IMMEDIATE NEXT ACTIONS (This Week)

1. Rewrite resume highlighting Java, DSA, and ServiceNow certification | 2. Set up GitHub with pinned repos | 3. Solve 10 LeetCode problems (arrays + strings) | 4. Optimize LinkedIn profile + connect with 5 alumni | 5. Pick Project #1 and scope it out
